OVERVIEW

Credit One Bank, N.A. is a technology and data-driven financial services company offering a full range of consumer credit card products. As one of the largest credit card banks in the United States, Credit One Bank issues Visa®, Mastercard®, and American Express® products, as well as the Official Credit Card of NASCAR® and the Vegas Golden Knights. Credit One Bank is also the official credit card partner of the Raiders, Big 12 Conference, and Las Vegas Aviators. Learn more at CreditOneBank.com and connect with us @CreditOneBank on Facebook, Instagram, Twitter, YouTube, and LinkedIn.

Roles and Responsibilities

As a Web Developer at Credit One Bank, you will focus primarily on front-end web development. You may also work with other designers and developers in creating initial mockups and prototypes. You will routinely interface with external technology vendors, tools, software and services. You will work within secured site development, staging, and production environments, assure cross-browser and device compatibility, and perform Quality Assurance (QA), User Acceptance Testing (UAT), and post-deployment regression testing. Within the web development team’s workflow environment, you will jointly manage centralized source code repositories.

Education and Qualifications

Proficient in the modern web development toolbox, including HTML5, CSS3, JavaScript and jQuery.

Capable of implementing Responsive / Adaptive web designs and the on-going resolution of cross-browser / device issues.

Experience with responsive front-end frameworks (e.g. Bootstrap, ZURB Foundation).

Working familiarity with JavaScript libraries such as Vue or React is a plus.

Strong familiarity with developing for mobile web browsers on iOS and Android, as well as desktop versions of Chrome, Safari, Edge and Firefox.

Skilled in the Adobe Creative Cloud suite of products, including Photoshop, Illustrator and XD.

Familiarity with Sketch as a means to intake templated mock-ups and convert them to coded...
Experience with distributed version control systems (the Atlassian stack in particular: SourceTree and Bitbucket; and, Git repositories in general).
Experience in integrating web APIs.
Knowledge of SCSS compilers and modern web workflow tools.
Working knowledge of Microsoft Office.
The ability to discuss projects with colleagues who have little technical knowledge of digital production techniques and tools.
Strong communication and problem-solving skills.

Preferred Skills
Familiarity with PHP is a plus.
Familiarity with enterprise-grade Content Management System (CMS) implementations, specifically Adobe Experience Manager (AEM) or other Java-based platforms, would be an advantage.

How to Apply
Send resume and cover letter to tiffany.whitehead@creditone.com or direct to the website:
