OVERVIEW

Credit One Bank, N.A. is a technology and data-driven financial services company offering a full range of consumer credit card products. As one of the largest credit card banks in the United States, Credit One Bank issues Visa®, Mastercard®, and American Express® products, as well as the Official Credit Card of NASCAR® and the Vegas Golden Knights. Credit One Bank is also the official credit card partner of the Raiders, Big 12 Conference, and Las Vegas Aviators. Learn more at CreditOneBank.com and connect with us @CreditOneBank on Facebook, Instagram, Twitter, YouTube, and LinkedIn.

Roles and Responsibilities

As a full-stack Web Engineer at Credit One Bank, you will bring your experience into focus developing interactive web-based applications and user interfaces within enterprise-grade website content management systems and other frameworks. You will work with teams of talented web developers and software engineers to architect, design, implement, and manage sites that serve millions of prospective and current credit card members.

Education and Qualifications

Bachelor’s degree and/or certifications in AEM, Computer Science, or related fields preferred. Expert working knowledge of modern web development tools: HTML5, CSS3, JavaScript (including jQuery and Node.js), JSON, and AJAX.

Experience with responsive front-end frameworks (e.g. Bootstrap, ZURB Foundation).

Working familiarity with JavaScript libraries such as Vue or React is a plus.

Knowledge of SCSS compilers and modern web workflow tools.

Working familiarity with layout systems such as CSS Grid or Flexbox is a plus.

Strong familiarity with enterprise-grade Content Management System (CMS) implementations, specifically Adobe Experience Manager (AEM) or other Java-based platforms, would be an advantage.
Working knowledge of Adobe Digital Asset Management (DAM), AEM Responsive Grid, Java Content Repository (JCR), CRXDE Lite, Apache Felix OSGi, Apache Sling, Sightly/HTL, Java/J2EE, Maven, and REST would be a plus.
Experience with integrated development environments (IDEs) such as Visual Studio Code, Eclipse, and/or IntelliJ.
Proficient in the Adobe Creative Cloud suite of products, including Photoshop, Illustrator and XD.
Working knowledge of relational databases such as MySQL, SQL, SQL2, and Oracle.
Experience in integrating web APIs.
Experience with distributed version control systems (the Atlassian stack in particular: SourceTree and Bitbucket; and, Git repositories in general).

Preferred Skills
Experience with Adobe Target, Adobe Analytics, and Adobe Dynamic Tag Management (DTM) is a plus.
Experience with Spring, Struts, PHP, and Laravel is a plus.
Experience with containerization / orchestration models like Docker or Kubernetes is a plus.
Strong communication and problem-solving skills.
