Overviews

William Hill is a worldwide brand that has been operating out of the United States since 2012. With over 82 years as a sportsbook in the UK, William Hill is a household name and one of the top employers in the industry. William Hill has many open positions across Nevada, including Reno and Las Vegas.

Roles and Responsibilities

The purpose of the Front End Developer (Javascript/Libraries) is to work with the Product Development and Software teams to execute the roadmap plans for William Hill’s online platform and mobile product offering.

Duties include:

- Develop, customize, maintain and monitor applications for web platforms, utilizing the latest technologies.
- Responsible for analyzing business requirements and translating them into technical terms.
- Documenting solutions and communicating with other team members on the way forward.
- Follow a Test Driven Development (TDD) approach to software development.
- Writes clean, tested, reusable code using best practice principles.
- Proactively investigates, analyses and fixes reported defects.
- Works to continually improve the quality of the codebase (for the product).
- Suggests adoption of new technologies and constantly considers what advantages could be gained by using these.
- Supports tech teams and wider William Hill colleagues to execute system improvements within a chosen field of expertise.
- Keeps up to date with industry standards and best practice in high performance, event sourced applications or bespoke business systems.
- Ensures all activities operate within William Hill IT Security and compliance standards.
- Communicate with other departments to educate support staff, manage releases and changes.
● Identify inefficiencies and where necessary implement changes to improve the end-to-end development process.
● Liaise with project teams to manage workload and prioritize tickets
