OVERVIEW

William Hill is a worldwide brand that has been operating out of the United States since 2012. With over 82 years as a sportsbook in the UK, William Hill is a household name and one of the top employers in the industry. William Hill has many open positions across Nevada, including Reno and Las Vegas.

Roles and Responsibilities
The purpose of the role is to work with the Product Development teams to execute the roadmap plans for William Hill’s online platform and mobile product offering other duties include:

- Develop, customize, maintain and monitor applications for web platforms, utilizing latest technologies.
- Responsible for analyzing business requirements and translating them into technical terms.
- Documenting solutions and communicating with other team members on the way forward.
- Follow a Test Driven Development (TDD) approach to software development.
- Writes clean, tested, reusable code using best practice principles.
- Proactively investigates, analyses and fixes reported defects.
- Works to continually improve the quality of the codebase (for the product).
- Suggests adoption of new technologies and constantly considers what advantages could be gained by using these.
- Supports tech teams and wider William Hill colleagues to execute system improvements within a chosen field of expertise.
- Keeps up to date with industry standards and best practice with event-sourced applications/bespoke business systems.
- Ensures all activities operate within William Hill IT Security and compliance standards.
- Communicate with other departments (to educate support staff, manage releases and communicate changes).
- Identify inefficiencies and where necessary implement changes to improve the end-to-end development process.
- Liaise with project teams to manage workload and prioritize tickets

**Education and Qualifications**

**MINIMUM POSITION REQUIREMENTS:**

- Bachelor’s Degree in Computer Science, Software Development, or any other relevant field.
- Minimum of 4 years of experience as a full stack developer.
- PHP 7+ and frameworks such as Laravel, Symfony.
- Familiar with applying design pattern solutions.
- Web architecture and services (HTTP, REST).
- Experience with cloud message APIs and usage of push notifications.
- Advanced JavaScript libraries and frameworks such as AngularJS, BackboneJS, ReactJS.
- Understanding and implementation of security and data protection.
- Testing frameworks including PHPUnit.
- Behavioral frameworks including Behat.
- Knowledge of code versioning tools like git.
- Knowledgeable in SQL database systems, and REST API’s.
- Basic understanding of mobile development environments and responsive web design would be considered an asset.
