Xtreme Manufacturing is looking for an Engineering Intern who can perform a wide range of administrative and support activities for the Engineering department.

Roles and Responsibilities

• Develops and improves manufacturing processes by studying product and manufacturing methods.
• Evaluates manufacturing processes by designing and conducting research programs; applying knowledge of product design, fabrication, assembly, tooling, and materials; conferring with equipment vendors; soliciting observations from operators.
• Develops manufacturing processes by studying product requirements; researching, designing, modifying, and testing manufacturing methods and equipment; conferring with equipment vendors.
• Improves manufacturing efficiency by analyzing and planning work flow, space requirements, and equipment layout.
• Assures product and process quality by designing testing methods; testing finished-product and process capabilities; establishing standards; confirming manufacturing processes.
• Provides manufacturing decision-making information by calculating production, labor, and material costs; reviewing production schedules; estimating future requirements.
• Prepares product and process reports by collecting, analyzing, and summarizing information and trends.
• Provides manufacturing engineering information by answering questions and requests.
• Keeps equipment operational by coordinating maintenance and repair services; following manufacturer's instructions and established procedures; requesting special service.
• Completes design and development projects by training and guiding technicians.
• Contributes to team effort by accomplishing related results as needed.
