SOFTWARE ENGINEER & DEVELOPER INTERNSHIP

Posting ID: IN19720445

Company Website: https://multichain.ventures/ and https://tokesplatform.org/

Company: Multichain Ventures, Inc

Work Location: Remote

Position Type: Part-Time

Salary: Unpaid

College Major(s): Computer Science (CS)

College Level(s): Undergraduate-Freshman, Undergraduate-Sophomore, Undergraduate-Junior, Undergraduate-Senior

OVERVIEW

Are you looking to be part of something important and special? Are you interested in new technologies and a fun start-up atmosphere?

Multichain Ventures is currently seeking a highly motivated individual for the software engineering and development team. This person should possess the enthusiasm and problem-solving skills needed to grow with our entrepreneurial company. We are looking for someone who wants to gain real-world software experience with the potential to grow into a full-time career.

An Intern at Multichain Ventures will experience and learn about the full software development life cycle. Several Multichain Ventures team members have more than a couple decades of accumulated experience in varying industries. Topics like the Agile Methodology, best practices in development and testing, automated systems, test engineering concepts from unit test, integration test, functional test, smoke test, regression test and others all are covered. Common industry set of tools, software, and processes are used at Multichain Ventures. The individual will have a front row seat and first-hand experience working with an incredibly diverse and experienced team of high functioning professionals.

Multichain Ventures is a U.S. based company. Brief description of the company, its founders, and executive team can be found here: https://multichain.ventures/ and https://tokesplatform.org/

Roles and Responsibilities

• Assist with planning, designing, coding, testing, implementing, and maintaining core and new software domains
• Collaborating with stakeholders to understand software-related business requirements
• Help with managing resources across multiple projects
• Hands-on experience with updating current systems to modern software architecture and
technologies
• Troubleshooting and solving user-related problems
• Creating end-to-end solutions and gaining valuable experience
• Must be available to work part-time hours (around 30 hours per week)

Education and Qualifications
• Have, or in the process of obtaining, an associate or bachelor's degree from an accredited institution
• Programming experience with JavaScript (or TypeScript), React, CSS
• Strong organizational, self-motivation, learning aptitude, and follow-through skills
