JR. TEST ENGINEER

Posting ID: EM19021407
Company: Owned Outcomes, Inc
Position Type: Full-Time
Company Website: https://ownedoutcomes.com/
Work Location: Las Vegas
Salary: $14-15/hr
College Major(s): Mechanical Engineering (ME), Electrical/Computer Engineering (EE/CpE), Computer Science (CS), Entertainment Engineering (EED)
College Level(s): Undergraduate-Senior, Graduate Student, Alumni

OVERVIEW

Owned Outcomes (O2) is a software company focused on delivering actionable insights to healthcare constituents like providers and payers to deliver better care at lower cost. O2 was recognized as a 2018 fast 500 award winner by Deloitte. We are looking for someone who is curious, self-motivated and like learning new things. Putting on your “super-user” cape, you have a knack for software and technology and love exploring the nooks and crannies of products to identify all the edge cases and user scenarios. Identifying bugs and enhancements gives you great satisfaction in knowing that you’ve ensured the best possible user experience for your customers. You love solving problems, no matter how big or complex, and you highly appreciate all the new things that you learn along the way to add to your toolkit.

Roles and Responsibilities
Provide testing, validation, and sign-off for software product development and release readiness (covering both the product release cadence and the Agile sprint cadence)
Define and manage the testing strategy for each product, from the library of test scripts down to the individual test cases
Write detailed test plans that meticulously cover the user stories’ acceptance criteria and foreseeable edge cases
Identify, document and prioritize defects and bugs, and work with the teams to investigate and resolve issues
Automate test scripts using Python, Selenium, and other languages or tools and integrate automated testing into the QA process
Provide first line customer support for both external and internal clients as needed
Opportunities to manage and lead various projects and initiatives

Education and Qualifications
Undergraduate degree in any major with some quantitative classes, or its equivalent. Can demonstrate quantitative / problem-solving orientation. A self-starter is more important than prior work experience.
- Strong analytical and problem-solving skills with a technically curious drive
- Uncompromising attention to detail and commitment to quality as demonstrated through past experiences
- Highly organized, self-directed, and accountable to timelines
- Excellent written and verbal communication skills

We require you to interact with colleagues live, so working out of our Las Vegas office location is a must (no telecommuting)

**US citizens and green card holders only—we are unable to provide sponsorship at this point

Preferred Skills
Software testing, test case writing, Python automation, JIRA

How to Apply
Please submit your cover letter and resume to: joslyn@ownedoutcomes.com
