 - Weight: 18.4oz

Instructions for Use/Setting Up

To turn on the lantern, press the button in the center of the lantern body. It will be on its highest setting after pressing the button the first time, and will subsequently dim with each press after until it turns off again.

Reviews*

"It was easy to pack, and the light output was very good."

"It is powerful for such a small lantern."

"This is an incredible lantern. It puts out a lot of light and the batteries last forever. You can take the top off and hang it upside down."

"This lantern is very well made, easy to turn on and off, and puts out two levels of light, the highest being sufficient to light a 9-person tent. The light output is also diffuse, so it's not as harsh as a lantern."

"Great lantern. Easy to use/setup. Bright light."
