

Publications

- Poineau, F.; Weck, P F.; Burton-Pye, B P.; Denden, I; Kim, K; Kerlin, W; German, KE.; Fattahi, M; Francesconi, L C.; Sattelberger, A P.; et al.. Reactivity of HTcO₄ with methanol in sulfuric acid: Tc-sulfate complexes revealed by XAFS spectroscopy and first principles calculations. *Dalton Transactions* (2013), 42(13), 4348-4352.
- Poineau, F.; Burton-Pye, B P.; Maruk, A; Kirakosyan, G; Denden, I; Rego, D B.; Johnstone, E V.; Sattelberger, A P.; Fattahi, M; Francesconi, Lynn C.; et al.. On the nature of heptavalent technetium in concentrated nitric and perchloric acid. *Inorganica Chimica Acta* (2013), 398, 147-150.
- Poineau, F; Mausolf, E; Jarvinen, G D.; Sattelberger, A P.; Czerwinski, K R. Technetium Chemistry in the Fuel Cycle: Combining Basic and Applied Studies. *Inorganic Chemistry* (2013), 52(7), 3573-3578.
- Johnstone, E V.; Weck, P F.; Poineau, F; Kim, E; Forster, P M.; Sattelberger, A P.; Czerwinski, K R. X-ray Crystallographic and First-Principles Theoretical Studies of K₂[TcOCl₅] and UV/Vis Investigation of the [TcOCl₅]²⁻ and [TcOCl₄]⁻ Ions. *European Journal of Inorganic Chemistry* (2013), 2013(7), 1097-1104.
- Johnstone, E. V.; Grant, D. J.; Poineau, F.; Fox, L.; Forster, P. M.; Ma, L; Gagliardi, L; Czerwinski, K R.; Sattelberger, A P. A Trigonal-Prismatic Hexanuclear Technetium(II) Bromide Cluster: Solid-State Synthesis and Crystallographic and Electronic Structure. *Inorganic Chemistry* (2013), 52(10), 5660-5662.
- Kerlin, W M.; Poineau, F; Czerwinski, K R.; Forster, P M.; Sattelberger, A P. Hydrothermal synthesis and solid-state structure of Tc₂(O₂CCH₃)₄Cl₂. *Polyhedron* (2013), 58, 115-119.
- Poineau, F; Weck, P F.; Burton-Pye, B P.; Kim, E; Francesconi, L C.; Sattelberger, A P.; German, K E.; Czerwinski, K R. Diperoxo Pertechentic Acid Characterized by Spectroscopic and Quantum Chemical Studies. *European Journal of Inorganic Chemistry* (2013) – in press.
- Poineau, F., Johnstone, E V.; ; Czerwinski, K R.; Sattelberger, A P. Characterization of TcCl₄ and TcCl₃ by X-ray Absorption Fine Structure Spectroscopy. *Journal of Radioanalytical and Nuclear Chemistry*. (2013) – in press.
