The National Association of Graduate-Professionals Students in association with the Syracuse University Graduate School presents

**NAGPS Pre-Conference Forum on Research Methods**

Methodological approaches span across the disciplines. Through engages the approach via a diverse lens, one can explore beyond the limitations of an individual perspective. The methodology of a research project is a fundament component. Whether it is a dissertation, publication of presentation, methodological considerations are at the core of academic research.

We invite graduate students to submit an abstract, paper or proposal for consideration in the NAGPS Pre-Conference Forum on Research Methods. The goal of this daylong event is to promote the exchange of information about research practices and foster visibility of graduate research through the organization. NAGPS in collaboration with the Graduate Programs Office at Syracuse University, seeks to foster and uphold the promotion of research integrity, transparency, reproducibility and credibility of graduate student work, which is diverse and paving the way for the future of academia.

Graduate students are invited to submit proposals for a 15-minutes presentation (in a panel format), or posters describing their research and outlining the methodology approach. Presentations may involve work already presented in a scholarly venue, as well as work in progress, provided that the focus is on the method employed (e.g., data collection, management, and interpretation) rather than on the results of the research or its contribution to a given field. Both tabletop and easel poster displays will be available.

Submit your proposal online at

by **Sunday, October 1, 2017.** SU faculty and the SU Libraries research forum team will review proposals, and applicants notified of their proposal status no later than **October 13, 2017.**
