The School of Nursing requires 1-2 graduate assistants to engage in research-related activities specific to skeletal muscle injury/recovery. This position is under the supervision of Dr. Barbara St. Pierre Schneider.

Job Description
Hours: 20 hours per week.
Duties: Perform computer-assisted image analysis using microscope slides. Assist with data collection, entry, and analysis. Also, assist with animal procedures and other duties as assigned. Application materials are currently being accepted and will be reviewed as they are received. Position starts 21 August 2017.

Minimum Qualifications:
- Fully admitted to a Master’s or PhD program at UNLV
- Good academic standing (i.e., 3.5 GPA or higher)
- Enrolled in at least 6 credits during fall 2017 and spring 2018
- Ability to work under pressure
- Work independently with little to no direction
- Dependable and able to work some evenings
- Schedule flexibility
- Strong attention to detail
- Excellent psychomotor skills
- Team work experience
- Excellent communication skills
- Willing to go above and beyond to accomplish tasks
