MS MIS Bridge Option

The Bridge Option enables students to start on a Master of Science in MIS (MS MIS) while they are still an undergraduate student. This program is open to all UNLV undergraduate students, and not just those in the Lee Business School or the Information Management BSBA.

Qualified BSBA students who are interested in enrolling in the Master of Science in MIS (MS MIS) program can take the following graduate courses upon approval by the MIS Coordinator:

- MIS 744 IS Planning & Strategy
- MIS 764 E-Commerce
- MIS 766 Data Management
- MIS 768 Java Programming

MIS minors may use these courses to fulfill the requirements of the IM minor. BSBA Information Management majors may fulfill their requirements for their degree in the following way:

- MIS 744 replaces IS 491
- MIS 764 fulfills IM elective
- MIS 766 replaces IS 475
- MIS 768 replaces IS 380

For students that get subsequently admitted into the MS MIS program, any of the MIS graduate courses that they have completed, with a grade of "B" or better, as part of the Bridge Option at UNLV will be waived in the MS MIS program. Courses completed with a B- or lower cannot be so used. That means that students can complete the MS MIS degree with as little as 24 additional credits or one year of full-time study. Details on the MS MIS degree and admission requirements are available at http://business.unlv.edu/met. To qualify for graduate participation, undergraduate students must meet the following requirements at time of enrollment in each graduate course:

Requirements

- Upper Level Undergraduate Standing
- Minimum 3.00 overall GPA
- Recommendation of the MIS Graduate Coordinator

Recommendation of the coordinator must be obtained for each such course registration. To apply for graduate enrollment, undergraduate students must submit a completed Bridge Option Enrollment Request form, available at http://business.unlv.edu/met, to the MIS Coordinator, no less than two weeks before the beginning of the semester for which they would like to register for graduate courses.

Approval to take these graduate courses does not convey a preference for admission to the MS MIS program. See the MS MIS Course Descriptions at https://www.unlv.edu/met/course-descriptions for course details.
