RESEARCH ASSISTANT

Posting ID: EM187223F6
Company: Language Development Lab
Position Type: Part-Time
College Major(s): Electrical/Computer Engineering (EE/CpE), Computer Science (CS)

OVERVIEW

The Language Development Lab in the Department of Psychology is looking for research assistants. Research can be conducted via independent study (i.e., research course credit) or on a volunteer basis. Much of our research focuses on how children learn to use their perception to develop a partial interpretation of language, including word meanings and phrase structures. We conduct both experimental and computational work, which makes direct ties to work done in Psychology, Linguistics, and Computer Science.

Roles and Responsibilities
The research assistant will help us with running online experiments and build computational theories of language and cognitive development.

Education and Qualifications
Currently, we are looking for research assistants either with computational modeling experience, or with web design and management experience.

How to Apply
To learn more about the lab and to inquire about the position, please email Dr. Wang at haowang1@psych.upenn.edu with a short paragraph describe your academic background, and what you hope to achieve via working with us. An unofficial transcript would be helpful too.
