Company: 60East Technologies, Inc.

Position Type: Full-Time

College Major(s): Computer Science (CS)

Company Website: http://www.crankuptheamps.com

Work Location: Las Vegas

Salary: DOE

College Level(s): Undergraduate-Junior, Undergraduate-Senior

OVERVIEW

60East Technologies was founded in 2010 by a world-class tandem of system programming experts with a proven track record of delivering systems to the most demanding customers. The team's experience and expertise building high performance systems over the past twenty years, has led to the development of a technology, AMPS, that will revolutionize how real-time messaging is used to build modern applications that scale into the future. 60East Technologies is committed to building the fastest real-time streaming database software and helping application developers deliver solutions that outperform their peers.

Roles and Responsibilities

You’re not just any intern. Don’t settle for just any internship. We’re looking for people who love technology and high performance computing. People who don’t just care about flawless code, but who want to make sure that the code really works for customers. People who believe that a company can only succeed when customers succeed. People who want to build relationships with customers, not just drop code on their doorstep. People who want to ship software that’s used in demanding, real-world environments. People who take their work seriously and want to have fun while getting things done.

If that’s you, read on!

60East is a fast growing company on the forefront of high-performance computing solutions. Our flagship product, the Advanced Message Processing System (AMPS), powers mission-critical systems for some of the largest financial institutions in the world.

In this role, you’ll be helping to develop and test AMPS, with an emphasis on maintaining our performance lab environment and improving our ability to demonstrate and validate AMPS performance.

We use the world’s greatest hardware to build the world’s best software, in conjunction with our partners (such as IBM, Intel, SanDisk, Mellanox, and others). We pride ourselves on finding the best developers in the industry, and in this role you’ll be working alongside people with experience that runs the spectrum from web startups to open source projects to the biggest software companies in the world.
Education and Qualifications
- Proficiency in at least one of: Python, C#, Java, C++, Javascript
- Experience with Linux systems
- Ability to get things done independently
- Good communication skills and the ability to work with a geographically dispersed team
- Ability to help with server and hardware installation

Preferred Skills

How to Apply
To get started, submit a resume and cover letter to jobs@crankuptheamps.com, with “Best Internship Ever!” in the subject line.
