JOINT ELECTRICAL ENGINEER

Posting ID: EM16A3009C

Company: Duco Technologies

Company Website: http://www.ducotech.com

Work Location: Henderson, NV

Position Type: Full-Time

College Major(s): Electrical/Computer Engineering (EE/CpE)

College Level(s): Undergraduate-Senior

OVERVIEW

Duco has been around for 30 years. We act as a design, development, and manufacturing group for our customers. Our customers are in various consumer product industries such as: outdoors, aftermarket automotive, audio/music, digital imaging, Android tablets, and others.

We are looking to add an Entry level EE to the Engineer Dept. This person will work underneath a Senior EE working on actual projects.

Roles and Responsibilities

Be the Electrical Engineer for assigned projects and drive all technical aspects of a project, works in conjunction with a Senior Engineer, Project Manager, Department Manager, Sales Manager, Production Manager and/or Senior Management.

Works closely with Sales personnel and Senior Management to set priorities between projects and to coordinate the delivery of technologies to the customer.

Ensures that a design can meet the customer's requirements utilizing best practices and application of new technologies.

Interact with Sales, Management and Customers to provide technical guidance, applying those technologies in unique ways to insure customer’s requirements are met.

Write or review product specifications to insure electrical issues, testing and inspecting our products verifies that the technology we are using is delivered to our customers correctly and meets expectations.

Write or review QC inspections procedures to ensure that all electrical requirements are being properly tested to ensure the product meets the technical specifications.

Work with Senior Engineers to learn and utilize effective engineering practices and procedures.
May be assigned Project Management responsibilities and duties on an as needed basis.
