Student

OVERVIEW

Tesla is accelerating the world's transition to sustainable transportation and electricity consumption by designing and manufacturing electric vehicles and energy storage systems. Working out of the Tesla Gigafactory, this position will lead and support internal and external projects to build a world-class workforce and education system in the Gigafactory region.

Roles and Responsibilities

This position will partner with Tesla business and recruiting leaders to define objectives and execute innovative programs and partnerships for workforce development and education in Gigafactory region. In addition, this position will establish relationships with and serve as single point of contact for workforce development and education partnerships between Tesla and institutions in Nevada. Finally, this position will lead Tesla's program of direct investments in K-12 and higher education in Nevada, while representing Tesla externally through attending events, limited public speaking engagements and participating on local boards and committees.

Education and Qualifications

BA/BS, MS, or advanced degree in a business, education, or technical field

Preferred Skills

A background in workforce development or technical education is preferred but not required. Alternatively, a leadership role in a business, operations, investment or technical field combined with a passion for education, workforce development, and developing world-class talent is desirable. In addition, a demonstrated ability to execute complex projects with large teams and organizations, an entrepreneurial approach to generating ideas and solving problems, and exceptionally high levels of self-motivation, drive, and intellectual curiosity are highly desirable.
