OVERVIEW

Louis Berger has an exciting opening for a Transportation Intern to work with our transportation engineering team in the Las Vegas, NV office, specializing in traffic, civil, and structural engineering.

Roles and Responsibilities

The Transportation Intern will have the opportunity to support both local and national key projects that include but are not limited to aiding professional engineers with the following:

- Development of civil and structural design plans.
- Perform basic traffic, civil, and structural calculations.
- Traffic data collection and analysis.
- Technical writing and report documentation.
- Preparation of cost estimates.
- Limited travel to job sites may be required.

Education and Qualifications

The successful candidate will have the following:

- Courses specific to traffic, civil, and/or structural disciplines.
- Experience with Microstation and/or AutoCAD.
- Excellent interpersonal, analytical, technical writing and communication skills.
- Energetic candidate comfortable working in a collaborative team environment.
- Good grades with interest in civil/highway/structural engineering.
- Proficiency with MS office required.
