**AZURE TECHNICAL TRAINER**

**Posting ID:** EM20230480  
**Company Website:** https://www.microsoft.com/en-us/

**Company:** Microsoft  
**Work Location:** Various

**Position Type:** Full-Time  
**Salary:**

**College Major(s):** Computer Science (CS)  
**College Level(s):** Undergraduate-Senior, Graduate Student, PhD. Student, Alumni

**OVERVIEW**

Do you want to join an exciting, fast paced and innovative team? If you’re excited about technology and helping Customers, Partners and external communities learn, if you like to see that ‘lightbulb’ moment in others, come join us and put your skills to great use!

Skilling has never been more important than it is right now – technology is changing every second of the day and companies need skilled employees to enable them to innovate and succeed.

Come join Worldwide Learning’s Tech Skills for Business program as we help our customers realize their potential through their employees. Help guide our approach and be ready to join a group where all ideas are heard and providing technology education is job one.

In this role, you will spend your time educating employees from companies all over the world on our Azure cloud. We'll help you become a best-in-class technical trainer, you'll help us drive the right skills that enable our customers to succeed.

If you're already passionate about technology and motivating others, if you relish the opportunity to help revolutionize what it means to skill and be skilled, then all that's left is for you to apply and help us empower every organization and individual to achieve more.

**Roles and Responsibilities**

In this role, you will motivate, engage and skill students on our Azure cloud  
You should enjoy continually skilling yourself on the most innovative technologies relating to cloud computing  
As part of this forward-thinking group, you will help shape the future of the Azure training program  
You will provide feedback that improves and innovates our technical training content, lab exercises, presentations, and accompanying materials  
Through all of the above, you will be an Azure Platform evangelist with customers, partners and external communities
Education and Qualifications
You will hold a Bachelor’s degree or have equivalent work experience in computer science, engineering, or related technical fields
Ideally you will hold a current Microsoft Certified Trainer qualification, but this is not required.
If you don’t and you’re a great fit, we’ll help you get one
You will have conducted classroom training related to technology (can be in a non-work related setting)
You will have a broad understanding of cloud computing concepts and solutions
If you have hands-on experience with Microsoft Azure, then that’s a bonus
You will be a motivating communicator, able to help students turn abstract concepts into reality
You should enjoy meeting people from all backgrounds, and have the ability to travel to engage them (50-75%)

How to Apply
