OVERVIEW

Harris Consulting Engineers is an established firm providing mechanical, plumbing, and electrical engineering services for the construction industry. Projects are both new construction and renovation, including commercial, higher education, K-12, retail, hospitality and government. With 28 team members, we are the ‘right-sized’ firm in the most exciting city in the world! www.harrisengineers.com

Roles and Responsibilities
As an Mechanical Designer, you are responsible for carrying out policies, procedures and programs developed and approved by the Professional Engineer. You must be self-disciplined, communicate effectively, and coordinate with team members and clients in a professional manner. You must be ready to contribute and succeed in a team environment. ABOVE ALL YOU MUST BE READY TO LEARN!

You prepare mechanical designs using engineering formulas and skills in accordance with instructions from the Professional Engineer and Project Manager. You communicate with the client to define, identify areas requiring clarifications, and coordinate system requirements with fellow team members. You prepare electrical system plans and specifications in an organized and timely manner.

Education and Qualifications
- BS or BAE in Mechanical or Architectural Engineering
- EIT certification preferred / goal of obtaining PE License

Preferred Skills
AutoCad, Revit
