Biography

Jason Richards is a first year student in the UNLV Radiochemistry Program. He earned a B.S. degree in Chemistry from Utah State University in Logan, Utah where he is originally from. He developed an interest in radiochemistry while participating in a summer internship at Oak Ridge National Laboratory. He later participated in the 2013 Nuclear Chemistry Summer School at San José State University. He will be performing radiochemistry research focusing on the separation of americium in high oxidation states from curium utilizing extraction chromatography.
