### **Biography**

Rosendo Borjas is a 2<sup>nd</sup> year student in the UNLV Radiochemistry PhD Program. He received a B.S. in Chemistry from UNLV. He applied to our program after being part of the Radiochemistry Fuel Cycle Summer School in 2013. During his first semester he became part of the technetium subgroup, where his interests are synthesis and characterization of new compounds. His current research involves the synthesis of rhenium ternary oxides. He also has a student contractor position at the Environmental Protection Agency.
