The Proposal Development unit within the Office of Sponsored Programs publishes this notice on a bi-weekly basis. If you are interested in any of the opportunities listed, and would like review/editing assistance with a proposal, please contact Carol Brodie at 5-1328, carol.brodie@unlv.edu. However, for opportunities from foundations, please contact Caleen Johnson at 5-2828, caleen.johnson@unlv.edu. Please see the Proposal Development website, http://www.unlv.edu/research/proposal for a complete list of our office’s services. An archive of these newsletters can be found at http://www.unlv.edu/research/archives.

**Announcements**

**Opportunities for Students**

UNLV’s Office of Undergraduate Research (OUR) has information on their website about research and funding opportunities for undergraduate students. Check them out here: http://www.unlv.edu/our.

The Office of Sponsored Programs maintains a list of some financial resources for both graduate and undergraduate students: http://www.unlv.edu/research/financial-resources-graduate-and-undergraduate-students

**Society for the Advancement of Behavior Analysis - SIDNEY W. & JANET R. BIJOU GRANT**

http://saba.abainternational.org/grants/sidney-w-janet-r-bijou-grant/

This grant will be provided to support doctoral student research designed to improve our understanding of children's development, based on behavior analytic and developmental science concepts. Developmental concepts could include chronological and developmental age, or neurobiological and genetic factors associated with development. While intervention research could be appropriate, the primary research questions (independent variables) must be related to developmental principles. Examples are changes in reinforcer preference with age, and effectiveness of verbal behavior interventions in children of differing developmental ages. The primary purpose may not be to overcome deficits or challenges associated with a behavioral disorder or developmental disability (e.g., ADHD, autism), independent of a fundamental developmental principle.

**Deadline:** March 1, 2017
American Water Works Association Research Foundation - Scholarships  

The American Water Works Association invites applications for the Scholarships to encourage and support outstanding students pursuing advanced training in the field of water supply and treatment.  
**Deadline:** January 10, 2017

Leakey Foundation - General Research Grants (to support research into human origins)  
https://leakeyfoundation.org/grants/research-grants/  
The Leakey Foundation exclusively funds research related specifically to human origins. Priority of funding is commonly given to exploratory phases of promising new research projects that meet the stated purpose of the Foundation. The majority of The Leakey Foundation’s Research Grants awarded to doctoral students are in the $3,000-$15,000 range. Larger grants given to senior scientists and post-doctoral students may be funded up to $25,000.  
**Deadlines:** January 10; July 15

Department of Energy - DOE Scholars (Summer Internships -- Undergraduates, Grad Students & Post-Graduates)  
http://orise.orau.gov/doescholars/  
The DOE Scholars Program offers unique opportunities that introduce students or post-graduates to the agency’s mission and operations. The U.S. Department of Energy is committed to:  
- Energy security  
- Nuclear security  
- Scientific discovery and innovation  
- Environmental responsibility  
- Management excellence  
**Deadline:** December 15, 2016

U.S. Department of Homeland Security (DHS) - Summer Internships  
http://www.orau.gov/dhseducation/internships/  
The U.S. Department of Homeland Security (DHS) Science and Technology Directorate Office of University Programs sponsors a 10-week summer internship program for students majoring in homeland security related science, technology, engineering and mathematics (HS-STEM) disciplines. The program provides students with quality research experiences at federal research facilities located across the country and allows students the opportunity to establish connections with DHS professionals. It is open to undergraduate and graduate students in a broad spectrum of HS-STEM disciplines and DHS mission-relevant Research Areas.  
- 10-week research experiences are offered at: Coast Guard Research and Development Center ● Customs and Borders Protection ● Engineer Research and Development Center ● Federal Emergency Management Agency ● Immigration and Customs Enforcement, Health Service Corps ● National Security Technologies ● National Urban Security Technology Laboratory ● Naval Research Laboratory ● Office for Interoperability and Compatibility ● Transportation Security Laboratory ● DOE National Laboratories: Argonne, Berkeley, Idaho, Livermore, Los Alamos, Oak Ridge, Pacific Northwest, and Sandia  
- Areas of research: Engineering, computer science, mathematics, physics, chemistry, biological / life sciences, environmental science, emergency and incident management, social sciences, and more.  
- U.S. citizenship required  
**Deadline:** December 7, 2016

Oak Ridge Associated Universities, Oak Ridge National Laboratory -- Advanced Short-Term Research Opportunity (ASTRO)  
http://www.orau.org/ornl/astro/default.htm

The Oak Ridge National Laboratory Advanced Short-Term Research Opportunity Program is a highly selective program offering challenging short-term research opportunities to persons working on or holding recent Master’s or Doctoral degrees. ASTRO participants conduct research in areas that support ORNL missions in the basic and applied sciences, energy, and environment. Appointments are available in all current research and development programs at the Laboratory. Applicants must be enrolled in a Master’s or a Ph.D. program at an accredited
institution, or hold a recent (within the past five years) Master’s or Ph.D. degree, or have a Master’s equivalency in a science, technology, engineering or mathematics (STEM) area. There are no U.S. citizenship or GPA requirements.

**Deadline:** Applications are accepted on a year-around basis

**Krell Institute - DOE Computational Science Graduate Fellowship**

https://www.krellinst.org/csgf/how-apply

The Department of Energy Computational Science Graduate Fellowship (DOE CSGF) provides outstanding benefits and opportunities to students pursuing doctoral degrees in fields that use high-performance computing to solve complex science and engineering problems. The program fosters a community of energetic and committed Ph.D. students, alumni, DOE laboratory staff and other scientists who want to have an impact on the nation while advancing their research. Fellows come from diverse scientific and engineering disciplines but share a common interest in using computing in their research.

**Deadline:** January 18, 2017

**National Science Foundation - Research on the Science and Technology Enterprise: Statistics and Surveys - R&D, U.S. S&T Competitiveness, STEM Education, S&T Workforce**

http://www.nsf.gov/funding/pgm_summ.jsp?pims_id=5265

The National Center for Science and Engineering Statistics (NCSES) of the National Science Foundation (NSF) is one of the thirteen principal federal statistical agencies within the United States. It is responsible for the collection, acquisition, analysis, reporting and dissemination of objective, statistical data related to the science and engineering enterprise in the United States and other nations that is relevant and useful to practitioners, researchers, policymakers and the public. The Center would like to enhance its efforts to support analytic and methodological research in support of its surveys, and to engage in the education and training of researchers in the use of large-scale nationally representative datasets. NCSES welcomes efforts by the research community to use NCSES data for research on the science and technology enterprise, to develop improved survey methodologies for NCSES surveys, to create and improve indicators of S&T activities and resources, and strengthen methodologies to analyze and disseminate S&T statistical data. To that end, NCSES invites proposals for individual or multi-investigator research projects, doctoral dissertation improvement awards, workshops, experimental research, survey research and data collection and dissemination projects under its program for Research on the Science and Technology Enterprise: Statistics and Surveys.

**Deadline:** January 17, 2017

**Arts and the Humanities**

**American Philosophical Society - Phillips Fund Grant for Native American Research**

http://www.amphilsoc.org/grants/philips

The Phillips Fund of the American Philosophical Society provides grants for research in Native American linguistics, ethnohistory, and the history of studies of Native Americans, in the continental United States and Canada. Grants are not made for projects in archaeology, ethnography, psycholinguistics, or for the preparation of pedagogical materials. The committee distinguishes ethnohistory from contemporary ethnography as the study of cultures and culture change through time. The grants are intended for such costs as travel, tapes, films, and consultants’ fees but not for the purchase of books or permanent equipment or to pay income tax on the award.

**Deadline:** March 1, 2017

**Harvard University - W. E. B. Du Bois Institute for African and African American Research -- Fellows Program**

http://hutchinscenter.fas.harvard.edu/fellows-program

The Fellows Program is at the heart of the activities of the W. E. B. Du Bois Research Institute. Started in 1975 as the W. E. B. Du Bois Institute for African and African American Research, the Institute has annually appointed scholars who conduct individual research for a period of one to two semesters in a wide variety of fields related to African and African American Studies. With a record of supporting more than 300 Fellows since its founding, the Institute has arguably done more in its short existence to ensure the scholarly development of African and African American Studies than any other pre-doctoral or post-doctoral program in the United States. Fellows work in a range of fields and interests, including art and art history, Afro-Latin American research, design and the history of
design, education, hiphop, African studies, the African diaspora, African American studies, literature, and creative writing.

**Deadline: January 23, 2017**

**Harvard University, Davis Center for Russian and Eurasian Studies -- Fellows Program**
http://daviscenter.fas.harvard.edu/research/individual-research/fellows-program

The Davis Center's Fellows Program brings together scholars at early and later stages in their careers to consider a common theme spanning the social sciences and humanities. Each year, a team of faculty affiliates coordinates this theme and leads a regular interdisciplinary seminar series in which Fellows participate, with advanced graduate students and invited speakers, in addition to pursuing their own research. The program theme is "Revolution(s) in Eurasia."

**Deadline: January 10, 2017**

**National Science Foundation - Science, Technology, and Society (STS)**
http://www.nsf.gov/funding/pgm_summ.jsp?pims_id=503584

The Science, Technology, and Society (STS) program supports research that uses historical, philosophical, and social scientific methods to investigate the intellectual, material, and social facets of the scientific, technological, engineering and mathematical (STEM) disciplines. It encompasses a broad spectrum of STS topics including interdisciplinary studies of ethics, equity, governance, and policy issues that are closely related to STEM disciplines, including medical science.

**Deadlines: February 2, 2017; August 3, 2017**

Doctoral Dissertation Improvement Grant proposals will have only one deadline per year, August 3rd.

---

**Education, Business and Social Sciences**

**Leakey Foundation - General Research Grants (to support research into human origins)**
https://leakeyfoundation.org/grants/research-grants/

The Leakey Foundation exclusively funds research related specifically to human origins. Priority of funding is commonly given to exploratory phases of promising new research projects that meet the stated purpose of the Foundation. The majority of The Leakey Foundation’s Research Grants awarded to doctoral students are in the $3,000-$15,000 range. Larger grants given to senior scientists and post-doctoral students may be funded up to $25,000.

**Faculty interested in this opportunity for research grants should contact Caleen Johnson at 5-2828, caleen.johnson@unlv.edu**

**Deadlines: January 10; July 15**

**Harvard University - W. E. B. Du Bois Institute for African and African American Research -- Fellows Program**
http://hutchinscenter.fas.harvard.edu/fellows-program

The Fellows Program is at the heart of the activities of the W. E. B. Du Bois Research Institute. Started in 1975 as the W. E. B. Du Bois Institute for African and African American Research, the Institute has annually appointed scholars who conduct individual research for a period of one to two semesters in a wide variety of fields related to African and African American Studies. With a record of supporting more than 300 Fellows since its founding, the Institute has arguably done more in its short existence to ensure the scholarly development of African and African American Studies than any other pre-doctoral or post-doctoral program in the United States. Fellows work in a range of fields and interests, including art and art history, Afro-Latin American research, design and the history of design, education, hiphop, African studies, the African diaspora, African American studies, literature, and creative writing.

**Deadline: January 23, 2017**

**National Science Foundation - Research in Engineering Education**
http://www.nsf.gov/funding/pgm_summ.jsp?pims_id=503584

The NSF Engineering (ENG) Directorate has launched a multi-year initiative, the Professional Formation of Engineers, to create and support an innovative and inclusive engineering profession for the 21st Century.
Professional Formation of Engineers (PFE) refers to the formal and informal processes and value systems by which people become engineers. Professional Formation includes, but is not limited, to:

- Introductions to the profession at any age;
- Acquisition of deep technical and professional skills, knowledge, and abilities in both formal and informal settings/domains;
- Development of outlooks, perspectives, ways of thinking, knowing, and doing;
- Development of identity as an engineer and its intersection with other identities; and
- Acculturation to the profession, its standards, and norms.

As part of this initiative, the Research in the Formation of Engineers (RFE) program welcomes proposals that consider the construction of engineering knowledge, engineering identity, and the engineering profession, as well as interventions that expand the boundaries of each of these.

**Deadline:** January 25, 2017

**National Science Foundation - Research in the Formation of Engineers (RFE)**
http://www.nsf.gov/funding/pgm_summ.jsp?pims_id=503584

The NSF Engineering (ENG) Directorate has launched a multi-year initiative, the *Professional Formation of Engineers*, to create and support an innovative and inclusive engineering profession for the 21st Century. Professional Formation of Engineers (PFE) refers to the formal and informal processes and value systems by which people become engineers.

- Professional Formation includes, but is not limited, to:
- Introductions to the profession at any age;
- Acquisition of deep technical and professional skills, knowledge, and abilities in both formal and informal settings/domains;
- Development of outlooks, perspectives, ways of thinking, knowing, and doing;
- Development of identity as an engineer and its intersection with other identities; and
- Acculturation to the profession, its standards, and norms.

As part of this initiative, the Research in the Formation of Engineers (RFE) program welcomes proposals that consider the construction of engineering knowledge, engineering identity, and the engineering profession, as well as interventions that expand the boundaries of each of these.

**Deadline:** January 25, 2017

**National Science Foundation - Perception, Action and Cognition Program**
http://www.nsf.gov/funding/pgm_summ.jsp?pims_id=5686

The PAC program funds theoretically motivated research on a wide-range of topic areas focused on typical human behavior. The aim is to enhance the fundamental understanding of perceptual, motor, and cognitive processes and their interactions. Central research topics for consideration by the program include (but are not limited to) vision, audition, haptics, attention, memory, reasoning, written and spoken language, motor control, categorization, spatial cognition, and the interaction of sleep or emotion with cognitive or perceptual processes. The program welcomes a wide range of perspectives, such as individual differences, symbolic computation, connectionism, ecological, genetics, nonlinear dynamics and complex systems, and a variety of methodologies including both experimental studies and modeling. The PAC program is open to co-review of proposals submitted to other programs both within the Social, Behavioral, and Economic Sciences Directorate and across other directorates.

**Deadlines:**
- **February 1, 2017.** This proposal window is for research proposals only.
- **June 15, 2017.** This proposal window is only for workshop and conference proposals.
- **August 1, 2017.** This proposal window is for research proposals only.

**National Science Foundation - Science, Technology, and Society (STS)**
http://www.nsf.gov/funding/pgm_summ.jsp?pims_id=5324

The Science, Technology, and Society (STS) program supports research that uses historical, philosophical, and social scientific methods to investigate the intellectual, material, and social facets of the scientific, technological, engineering and mathematical (STEM) disciplines. It encompasses a broad spectrum of STS topics including interdisciplinary studies of ethics, equity, governance, and policy issues that are closely related to STEM disciplines, including medical science.

**Deadlines:** February 2, 2017; August 3, 2017

Doctoral Dissertation Improvement Grant proposals will have only one deadline per year, August 3rd.
National Science Foundation - Methodology, Measurement, and Statistics (MMS)
http://www.nsf.gov/funding/pgm_summ.jsp?pims_id=5421
MMS seeks proposals that are methodologically innovative, grounded in theory, and have potential utility for multiple fields within the social and behavioral sciences. As part of its larger portfolio, the MMS Program partners with a consortium of federal statistical agencies to support research proposals that further the development of new and innovative approaches to surveys and to the analysis of survey data. The MMS Program provides support through several different funding mechanisms. The following mechanisms are addressed in this solicitation:

- Regular Research Awards
- Awards for conferences, workshops, and community-development activities
- Doctoral Dissertation Research Improvement (DDRI) Grants
- Research Experience for Undergraduates (REU) Supplements

MMS also supports Faculty Early Career Development (CAREER) awards. Please see the CAREER Program Web Site for more information about this activity.

Deadline: January 26, 2017; August 31, 2017

Samuel Rubin Foundation – Grants in Social, Economic, Political, Civil and Cultural Rights
http://samuelrubinfoundation.org/application-guidelines/
The Samuel Robin Foundation makes small grants that meet its mission of the pursuit of peace and justice and the search for an equitable reallocation of the world’s resources. The Foundation believes that these objectives can be achieved only through the fullest implementation of social, economic, political, civil and cultural rights for all the world’s people. There are no geographic limitations, and the Foundation accept applications for general operating expenses as well as for specific projects within an organization.

If you are interested in this opportunity, contact Caleen Johnson at 5-2828, caleen.johnson@unlv.edu

Deadlines: January 4, 2017; May 3, 2017

Science, Mathematics and Engineering

Oak Ridge Associated Universities, Oak Ridge National Laboratory -- Advanced Short-Term Research Opportunity (ASTRO)
http://www.orau.org/ornl/astro/default.htm
The Oak Ridge National Laboratory Advanced Short-Term Research Opportunity Program is a highly selective program offering challenging short-term research opportunities to persons working on or holding recent Master’s or Doctoral degrees. ASTRO participants conduct research in areas that support ORNL missions in the basic and applied sciences, energy, and environment. Appointments are available in all current research and development programs at the Laboratory. Applicants must be enrolled in a Master’s or a Ph.D. program at an accredited institution, or hold a recent (within the past five years) Master’s or Ph.D. degree, or have a Master’s equivalency in a science, technology, engineering or mathematics (STEM) area. There are no U.S. citizenship or GPA requirements.

Deadline: Applications are accepted on a year-around basis

National Science Foundation - Long Term Research in Environmental Biology (LTREB)
http://www.nsf.gov/funding/pgm_summ.jsp?pims_id=13544
The Long Term Research in Environmental Biology (LTREB) Program supports the generation of extended time series of data to address important questions in evolutionary biology, ecology, and ecosystem science. Research areas include, but are not limited to, the effects of natural selection or other evolutionary processes on populations, communities, or ecosystems; the effects of interspecific interactions that vary over time and space; population or community dynamics for organisms that have extended life spans and long turnover times; feedbacks between ecological and evolutionary processes; pools of materials such as nutrients in soils that turn over at intermediate to longer time scales; and external forcing functions such as climatic cycles that operate over long return intervals.

The Program intends to support decadal projects. Funding for an initial, 5-year period requires submission of a preliminary proposal and, if invited, submission of a full proposal that includes a 15-page project description.
Proposals for the second five years of support (renewal proposals) are limited to an eight-page project description and do not require a preliminary proposal.

Deadlines:
Preliminary Proposal: January 23, 2017
Full Proposal: August 02, 2017

National Science Foundation - Division of Environmental Biology (Core Programs) (DEB)
http://www.nsf.gov/funding/pgm_summ.jsp?pims_id=503634
The Division of Environmental Biology (DEB) supports fundamental research on populations, species, communities, and ecosystems. Scientific emphases range across many evolutionary and ecological patterns and processes at all spatial and temporal scales. Areas of research include biodiversity, phylogenetic systematics, molecular evolution, life history evolution, natural selection, ecology, biogeography, ecosystem structure, function and services, conservation biology, global change, and biogeochemical cycles. Research on organismal origins, functions, relationships, interactions, and evolutionary history may incorporate field, laboratory, or collection-based approaches; observational or manipulative experiments; synthesis activities; as well as theoretical approaches involving analytical, statistical, or computational modeling.

Deadlines:
Preliminary Proposal: January 23, 2017
Full Proposal: August 02, 2017

National Science Foundation - Research on the Science and Technology Enterprise: Statistics and Surveys - R&D, U.S. S&T Competitiveness, STEM Education, S&T Workforce
http://www.nsf.gov/funding/pgm_summ.jsp?pims_id=5265
The National Center for Science and Engineering Statistics (NCSES) of the National Science Foundation (NSF) is one of the thirteen principal federal statistical agencies within the United States. It is responsible for the collection, acquisition, analysis, reporting and dissemination of objective, statistical data related to the science and engineering enterprise in the United States and other nations that is relevant and useful to practitioners, researchers, policymakers and the public. NCSES welcomes efforts by the research community to use NCSES data for research on the science and technology enterprise, to develop improved survey methodologies for NCSES surveys, to create and improve indicators of S&T activities and resources, and strengthen methodologies to analyze and disseminate S&T statistical data. To that end, NCSES invites proposals for individual or multi-investigator research projects, doctoral dissertation improvement awards, workshops, experimental research, survey research and data collection and dissemination projects under its program for Research on the Science and Technology Enterprise: Statistics and Surveys.

Deadline: January 17, 2017

National Science Foundation - Algorithms for Threat Detection (ATD)
https://www.nsf.gov/funding/pgm_summ.jsp?pims_id=503427
The Algorithms for Threat Detection (ATD) program will support research projects to develop the next generation of mathematical and statistical algorithms for analysis of large spatiotemporal datasets with application to quantitative models of human dynamics. The program is a partnership between the Division of Mathematical Sciences (DMS) at the National Science Foundation (NSF) and the National Geospatial Intelligence Agency (NGA).

Deadline: February 21, 2017

National Science Foundation - Research in Engineering Education
http://www.nsf.gov/funding/pgm_summ.jsp?pims_id=503584
The NSF Engineering (ENG) Directorate has launched a multi-year initiative, the Professional Formation of Engineers, to create and support an innovative and inclusive engineering profession for the 21st Century. MMS also supports Faculty Early Career Development (CAREER) awards. Please see the CAREER Program Web Site for more information about this activity.

Deadline: January 26, 2017; August 31, 2017

Medical/Health/Behavioral Sciences

Arthritis National Research Foundation - Research Grants (for Postdoctoral Fellows & Junior Faculty)
http://curearthritis.org/research-grant-application/
The arthritis grant offered by the Arthritis National Research Foundation (ANRF) is meant to jump-start research. ANRF is dedicated to funding highly qualified investigators associated with major research institutes, universities and hospitals throughout the country who are seeking to discover new knowledge for the prevention, treatment and cure of arthritis and other rheumatic diseases. Clinical and basic studies will be considered. Clinical studies should have a translational component that helps reveal the underlying mechanisms or response to therapy.

**Deadline:** January 13, 2017

**National Institutes of Health - Self-Management Interventions and Technologies to Sustain Health and Optimize Functional Capabilities (R01, R21)**

This Funding Opportunity Announcement (FOA) seeks clinical research on self-management interventions and technologies that improve health and quality of life in persons needing assistance to optimize and maintain existing functional capabilities, prevent/delay disabilities and navigate their environment. The research focus encompasses maintenance/restorative care that can be tailored to individuals' existing functional abilities and interests and is intended to enhance physical, sensory, motor, and mental capabilities. Of particular interest is research designed to maintain functional capabilities in such conditions as cardiac and respiratory insufficiency, movement impairment associated with arthritis, chronic back pain, stroke, and other physical or cognitive disabilities.

Although the above link uses the R01 grant mechanism, it runs in parallel with a program announcement of identical scientific scope, [PA-17-011](http://grants.nih.gov/grants/guide/pa-files/PA-17-011.html), which uses the exploratory/developmental (R21) grant mechanism.

**Deadlines:**
R01: February 5, June 5, October 5
R21: February 16, June 16, October 16
AIDS Applications: January 7, May 7, September 7

**National Institutes of Health - Community Partnerships to Advance Research (CPAR) (R01, R15, R21)**

This funding opportunity announcement (FOA) encourages researchers to partner with communities using Community Engaged Research (CEnR) methodologies that will enhance relationships leading to better interventions and positive health outcomes. Although the above link uses the R01 grant mechanism, it runs in parallel with two program announcements of identical scientific scope: [PA-14-141](http://grants.nih.gov/grants/guide/pa-files/PA-14-141.html), for exploratory/developmental (R21) grants, and [PA-14-140](http://grants.nih.gov/grants/guide/pa-files/PA-14-140.html), for R15 Academic Research Enhancement Awards (AREA).

**Deadlines:**
R01: February 5
R15: January 25
R21: February 16
AIDS Applications: January 7, May 7
PA-14-142 Expiration Date May 8, 2017

**National Institutes of Health - Products to Support Applied Research Towards Zero Suicide Healthcare Systems (R43/R44)**

This funding opportunity announcement (FOA) is intended to support Small Business Innovation Research (SBIR) grants that develop novel technologies for the purpose of advancing the National Action Alliance for Suicide Prevention’s “Zero Suicide” goal of preventing suicide events (attempts, deaths) among individuals receiving treatment within health care systems. Zero Suicide is a commitment to the prevention of suicide among individuals served by health care systems and is also a specific set of health care strategies and tools intended to eliminate suicide events. Research is still needed, however, to implement these goals effectively, and the incorporation of health information technology (health IT) products into this care program is critical. As such, this FOA specifically supports SBIR grants to develop technologies that enable healthcare settings to improve the development, management and/or delivery of services under the Zero Suicide framework.

**Deadlines:**
Letter of Intent: 30 days prior to the application due date
Application: September 5, January 5, April 5
National Institutes of Health - SBIR Technology Transfer (R43/R44)
This Funding Opportunity Announcement (FOA) encourages Small Business Innovation Research (SBIR) grant applications for projects to transfer technology out of the NIH intramural research labs into the private sector. If selected for SBIR funding, the SBC will be granted a royalty-free, non-exclusive patent license agreement for internal research use for the term of and within the field of use of the SBIR award to technologies held by NIH with the intent that the SBC will develop the invention into a commercial product to benefit the public.
**Deadlines:** September 5, January 5, April 5

University of Utah, Huntsman Cancer Institute, GMaP Region 6 Team - Research Scholar Pilot Fund Program
Pilot funds ($20,000*) are one-year grants for New or Early Stage Investigators focused on cancer health disparities. Applications are due December 30, 2016. Funding will begin on February 1, 2017. Eligibility Requirements:
- New or Early Stage Investigator
- Applicant must be a U.S. Citizen or U.S. Permanent Resident
- Applicant must address a relevant cancer health disparity problem within Region 6
- Applicant must be a minimum PhD candidate and provide proof of enrollment
