OVERVIEW

Headquartered in Las Vegas, Boyd Gaming Corporation is a leading diversified owner and operator of 24 gaming entertainment properties located in Nevada, Mississippi, Illinois, Indiana, Iowa, Kansas and Louisiana. We offer a wide range of careers at our corporate offices in Las Vegas, providing professional support to our operations nationwide.

Roles and Responsibilities
The IT Sr. Quality Assurance Analyst, under minimal supervision, is responsible for ensuring overall product quality and providing complete test coverage for each product tested. This team member is responsible for the bug triage process and ensuring that all issues are being handled efficiently. This team member collaborates directly with a cross-functional team of Architects, Designers, Engineers, Product Managers, and other stakeholders to facilitate the design and development process and ensure quality deliverables.

Some responsibilities will include, but are not limited to:
• Review requirements and ensure complete test coverage of product functionality.
• Drive testability requirements and process changes as necessary to achieve quality goals.
• Develop, maintain, and execute test scripts and test cases and execute tests to validate new and regress existing features.
• Prepare thorough and accurate documentation of analysis performed.
• Manage Bug Triage Process and ensure all issues are handled efficiently per process.
• Provide timely status updates and assist the team in making decisions about release readiness.
• Participate in all aspects of a full-lifecycle development methodology, and related quality concepts and processes.
• Performs troubleshooting software/hardware configuration problems.
• Exposed to automation test creation, execution and automation test script maintenance.
• Identifies and resolves escalations with emphasis on root cause analysis.
• Mentor and lead QA analyst(s) and ensure efficient distribution of testing responsibilities.
Education and Qualifications
• Must be at least 21 years of age.
• High school diploma or equivalent is required; Bachelor’s degree in a computer science discipline or a comparable level of experience preferred.
• Five (5) years of experience in a similar position strongly preferred.
• Minimum three (3) years with Data Warehouse concepts and ETL concepts.
• Minimum two (2) years of professional experience in reports and dashboard testing.
• Must have experience with Microsoft Office suite of products.
• Must have experience with Microsoft Team Foundation Server (TFS) or Team Services.
• Experience with Microsoft Test Manager (MTM) is strongly preferred.
• Proficiency with MS SQL Server and data modelling concepts.
• Prior experience with Agile Scrum is preferred.
• Prior experience with Test Driven Development is preferred.
• Prior experience with automated testing is preferred.
• Must have strong organizational, analytical, and troubleshooting skills.
• Excellent collaboration, reporting, analytical and problem solving skills.
• Must have strong communication, customer service, and interpersonal skills.
• Must be able to obtain and maintain any necessary certifications and/or licenses.
