SOFTWARE ENGINEER (UPDATED POSTING)

Posting ID: EM173283D5
Company: Bonn Corporation
Position Type: Full-Time
College Major(s): Computer Science (CS)

Company Website: http://www.BONNCorp.com
Work Location: Las Vegas
Salary: DOE
College Level(s): Undergraduate-Senior, Graduate Student

OVERVIEW

BONN Corporation (BONN) is a small company of dedicated engineers who have been servicing the Aerospace industry and the Department of Defense since 1990. BONN provides expertise in software design and development. Some areas that we commonly work with are instrumentation, batch processing, distributed systems, mission planning, embedded systems, and proof-of-concept applications for new systems. Our small team of engineers is also leveraged in the architecture of new and upcoming systems, as well as the assessment, and possible recovery, of struggling projects for customers.

BONN prides itself on the quality of its software engineers and their ability to integrate into existing or new teams to provide great value to our customers. Each team member is expected to be able to interact well with both high level management, as well as the lowest level user. We provide quality solutions, and that requires team members understanding of a project at all levels.

We offer:
• Challenging and fun work in an interesting and evolving field
• Flexible working hours
• Company funded annual training and growth opportunities
• Casual work environment with company provided drinks and snacks and private office
• Competitive compensation
• Company provided health, dental and vision Insurance
• Employee pre-tax SAR-SEP savings retirement plan
• Paid vacation, personal and holidays

Roles and Responsibilities
• Write efficient and well-designed code
• Design whole system solutions to meet customers’ needs
• Work with team members inside, and outside of the company
• Advise team members and management of projects on technical problems
• Interact with users and maintainers of systems to develop optimal solutions
• Maintain and sustain existing projects and solutions
• Work with project managers to balance expectations and timelines

Education and Qualifications
What we are looking for:
• Software Engineer
• Bachelor’s Degree in Computer Science, or an associated discipline
• Strong analytical problem solving skills
• Strong communication and presentation skills
• Solid understanding of Computer Science fundamentals (Object-Oriented Design, Data Structures, Complexity Analysis, Etc.)
• Proficiency with C++
• Proficiency with C# or Java
• Firm understanding and comfort with hardware, especially PC platform
• Solid understanding of SQL
• Experience with web services, multi-tiered architectures, and web hosting are a plus
• Must be a US Citizen and qualify for a security clearance.

Preferred Skills

How to Apply
Please submit resumes to David Bonnesar, President, at david@bonncorp.com.
