ENGINEERING INTERNSHIP

Posting ID: IN18A2001B

Company: Southwest Gas

Company Website: https://www.swgas.com/

Work Location: Las Vegas, NV

Salary: $18/Hr

Position Type: 15 hrs/wk during semester. 40 hrs/wk during summer

College Major(s): Civil Engineering (CEE), Construction Management (CEM), Mechanical Engineering (ME), Electrical/Computer Engineering (EE/CpE), Computer Science (CS)

College Level(s): Undergraduate-Freshman, Undergraduate-Sophomore, Undergraduate-Junior, Undergraduate-Senior, Graduate Student, PhD. Student

OVERVIEW

This is a Fall Engineering internship for Southwest Gas Corporation’s Southern Nevada North Operations office. We are looking for smart, enthusiastic and self-motivated engineering students that have good communication skills, critical thinking skills, are well organized, detail-oriented and can work independently in a fast paced environment.

The fall internship will evaluate interns for our summer internship program which is designed to provide a foundation of technical knowledge and professional experience while giving students the opportunity to learn the business of natural gas distribution. To foster professional growth and development the interns are expected to manage individual and group project assignments, perform network analysis utilizing system modeling software, and participate in meetings with internal and external customers. This position is 5 days per week for a minimum of 15 hours during the semester and 40 hours per week during school breaks. The summer internship program requires a 12-week commitment with a 40-hour work week.

Apply by 11/30/18

Roles and Responsibilities

The fall internship will evaluate interns for our summer internship program which is designed to provide a foundation of technical knowledge and professional experience while giving students the opportunity to learn the business of natural gas distribution. To foster professional growth and development the interns are expected to manage individual and group project assignments, perform network analysis utilizing system modeling software, and participate in meetings with internal and external customers.
