Navarro Research and Engineering, Inc. is recruiting for a Senior Project Controls Specialist in North Las Vegas, NV.

Navarro is a premier contractor providing high-quality technical services to DOE, NASA, and DOD. Navarro’s success is based on our customer service focus and our well-known responsiveness and innovation. In all we do, either in corporate management or in our services to our clients, we seek for the most effective and efficient approaches to provide best value to our clients.

Qualified applicants will be considered for positions at the Losee Road facility in North Las Vegas, Nevada, and/or at the Nevada National Security Site (located 65 miles northwest of Las Vegas, Nevada).

This position will perform duties as a Senior Project Controls Specialist. Support includes cost and schedule control for multiple projects as assigned by the Project Controls Manager. This position will support and interface directly with the multiple Program and Project Managers in addition to functional team members and other Project Controls Specialists.

Roles and Responsibilities
Responsibilities include, but are not limited to:

- Develop, maintain, and monitor control multi-year performance measurement baselines, including cost and schedule, baseline management and change control, risk management, subcontract management, earned value management, variance analysis, and estimate at completion
- Support the development and execution of program, project and functional planning
- Support for program/project teams in all phases of the project life cycle (initiation, planning, execution, control, and closure)
- Manage multiple funding sources from several different customers
- Develop performance measurement baselines using P6 and integrating into COBRA
- Assist Project Managers in developing metrics to support the measurement of
performance to cost and schedule objectives

- Perform detailed analysis of project cost, performance, and forecasts
- Prepare reports to reflect program/project status, cost and schedule trends, funding and project uncertainties
- Support project deliverables and assist in the development of project reviews for internal and external customer briefings
- Accept individual responsibility and accountability for environment, safety, health, and quality processes within personal control, personal safety, and the safety of co-workers
- Comply with established regulations and procedures for environment, safety, health, and quality and perform duties in a way that will not cause personal danger, endanger other individuals, or violate environment, safety, health, and quality regulations
- Promptly correct or report any hazard or potential hazard to supervision. Participate in and embrace MSTS environment, safety, health, and quality initiatives

Education and Qualifications

- Bachelor's degree in Engineering or related field.
- Previous P6 and COBRA experience.
- Developing, maintaining, monitoring and controlling multi-year performance measurement baselines, including cost and schedule, baseline management and change control, risk management, subcontract management, earned value management, variance analysis, and estimate at completion
- Experience developing performance measurement baselines using P6 and integrating into COBRA
- Due to the nature of the government contract requirements and/or clearances requirements, US citizenship is required.

Navarro is an equal-opportunity employer. All qualified applicants will receive consideration for employment without regard to race, religion, color, national origin, gender, age, sexual orientation, gender identity, status as a protected veteran, or status as a qualified individual with a disability.
