OVERVIEW

At Station Casinos, we pride ourselves on our service. We treat our guests how we like to be treated. We are a family and there is no place we’d rather be! It is our mission to provide a progressive environment in which all of our 14,000+ Team Members have an opportunity to enjoy their positions and grow in their careers, resulting in satisfied guests, thereby improving our overall fiscal performance.

Roles and Responsibilities
1. Responsible for practicing, supporting, and promoting Station Casinos’ “Beyond the Best” Company-wide culture and demonstrating Station Casinos’ Championship Service Standards at all times.
2. Ability to manage network infrastructure with urgency.
3. Ability to design and implement Corporate infrastructure to improve reliability and performance while managing costs.
4. Must be able to take the technical lead on developing and managing Company-wide capacity planning, architectural design, and redundancy to insure a stable and technically sound network environment.
5. Must be able to take the technical lead on the daily activities of the Network Engineering Team.
6. Ability to provide training to Team Members within the department.
7. Must be able to research new technologies, as well as evaluate and recommend new solutions that can increase security, manageability and/or performance of the Station Casinos network infrastructure.
8. Must be able to take the technical lead on all network infrastructure system related functions, including, but not limited to, patch management, security analysis, upgrade implementation, project scheduling, budgetary planning (capital & operating), preventative maintenance, system monitoring, problem diagnosis and resolution.
9. Communicate all potential outages to property and support areas prior to completion.
10. Provide Level III support to the Network Engineers for all problems that require escalation.
11. Communicate with other service and support departments on a regular basis to keep informed of potential issues or opportunities for improvement.
12. Perform additional duties as directed by the Manager of Network Engineering and/or the Director of Networking & Telecommunications.

**Education and Qualifications**
1. Ability to communicate effectively with Guests, Team Members and Management in both written and verbal form.
2. BS Degree in computer related field or equivalent work experience.
3. Minimum ten (10) years network systems support and operations experience preferably with the applications utilized by Station Casinos.
4. Passed the CCIE written test. Has CCIE certification or multiple mid-level certifications. Long term job experience may be substituted for CCIE requirement with the condition of successfully completing the CCIE written test within 1 year of employment with Station Casinos and successfully completing the CCIE lab exam 6 months after passing the written exam.
5. Must maintain CCIE level certification.
6. Ability to manage projects effectively and utilize resources appropriately to ensure a timely, quality product.
7. Ability to gather thoughts and ideas, and articulate expectations and information effectively.
8. MCSE and RHCE are preferred.
