ELECTRICAL SUMMER INTERN OPPORTUNITY

Posting ID: 
Company: San Diego Gas & Electric  Website: www.sdge.com/careers
Job Title: Summer Intern  Work Location: San Diego
Position Type: Full-Time (40 hrs/wk)  Salary: DOE
College Major(s): Electrical  College Level(s): Juniors, Seniors

OVERVIEW

Environmental stewardship is an essential part of our culture and our day-to-day business. Here’s just a glimpse of some of our environmental activities, facts, and achievements.

- **National climate leader.** We have twice been recognized by the U.S. Environmental Protection Agency for our efforts to combat climate change with the Supply Chain Leadership Award (2013) and the Organizational Leadership Award (2012), both honoring our efforts to reduce our carbon footprint through lowering greenhouse gas emissions.
- **Renewable leadership.** In 2012 more than 20 percent of the electricity supplied was from renewable sources compared to less than 1 percent in 2002.
- **Energy efficiency.** Over the last three years, customers have reduced their electricity use by more than 911 million kilowatt hours and their gas usage by more than 1.8 million therms. That’s enough electricity to power more than 150,000 homes for one year or taking more than 135,000 cars off the road for a year.

Roles and Responsibilities
Prepares or assists in the preparation of engineering designs, specifications, standards, studies and cost estimates in support of projects and tasks managed by others. Applies technical knowledge and skills toward the resolution of problems and the development of sound technical recommendations. Tasks may include, evaluation of new and existing products or systems, need for designs or specifications, and development of test apparatus or procedures.

Engineering Interns work under the direction of our Associate Engineers. Your willingness to learn from others and a can-do-attitude will make your experience with SDG&E personally and professionally rewarding. Competitive compensation and reimbursement for work-related travel are part of our investment in your future.

Strong candidates for this position generally require:

- Strong oral and written communication skills
- Strong interpersonal skills
- Good computer skills
- Strong analytical skills
- Relevant coursework
- Leadership activity
- Extracurricular and/or community involvement
- Must be able to work independently with minimal supervision

**Summer Internship includes:**
- Housing stipend provided during length of summer internship (where applicable)
- Networking events
- Competitive compensation
- Reimbursement for work-related travel
- 401K Contributions
- Cash Balance Plan Contributions
- Utility industry experience

**Qualifications and Education Requirements**
- Must be a US Citizen or Permanent Resident Alien
- Junior or first year Senior level students, working on completion of Bachelors of Science degree in Electrical, preferably with an interest in Power.
- GPA of 3.0 or above
