OVERVIEW

Sunrise Engineering is committed to producing quality work and lasting relationships. We are the only firm in the United States that has received the National PSMJ Premier Client Satisfaction Award eight years in a row. Certainly, we have shown our ability to deliver top quality communications, impressive performance, and cost-effective solutions. Our clients have deep confidence in our skilled engineers, which has led to long-term relationships and years of successful projects.

We collaborate with clients to deliver solutions that balance cost and performance. As a regional leader for professional engineering and consulting services, our disciplines serve a diverse range of public and private projects. Our staff of nearly 350 engineers, surveyors, technicians, trainers, and inspectors work together to make these projects successful and strengthen our communities.

Roles and Responsibilities
Responsibilities:

- Designs and supervises construction projects. These projects may range from water and waste water, land development, and transportation based on the need of the service center.
- Estimates costs and personnel and material needs for projects.
- Conducts studies and prepares written reports for clients.
- Takes the lead on projects and may supervise other engineers, EITs, drafters, and field personnel.
- May work individually or participate as part of a team for larger scale projects.
- A wide degree of creativity and latitude is expected.
- Assist in business development efforts.
- May assist in preparing statements of qualifications and proposals for potential clients.

Education and Qualifications
Requirements:
Successful candidates should have:
- a four-year civil engineering degree, P.E. license preferred, CAD experience and good verbal and written communication skills and 10+ years of experience working on water/wastewater, roadway and drainage projects.
- Preferred candidate’s experience will have an emphasis on general civil and storm water/waste water.
