CIVIL ENGINEERING

Posting ID: EM17310121

Company Website: https://www.navy.com/careers

Company: U.S. Navy

Work Location: Worldwide

Position Type: Full-Time

Salary: $50000-60000

College Major(s): Civil Engineering (CEE)

College Level(s): Undergraduate-Junior, Undergraduate-Senior, Graduate Student

OVERVIEW

Constructing city-size bases, airfields and harbor facilities. Managing large budgets and ambitious public works plans. Overseeing skilled construction professionals around the globe. This is the job of the Officers who make up the Civil Engineer Corps in America’s Navy.

Roles and Responsibilities

As part of the Navy Civil Engineer Corps, you can focus your work on any or all of the following areas:

Contract Management – Be the primary contact between Navy and civilian contractors, managing contracts worth up to hundreds of millions of dollars. Handle every aspect of a project, from overseeing construction to resolving design problems to ensuring that payments are correctly processed.

Public Works – Assume responsibility for any of the hundreds of Navy shore facilities – some as large as entire cities. Supervise and maintain utilities. Oversee construction and repair, manage budgets, approve public works plans, and provide services to visiting ships.

Construction Battalions – Command up to 600 Enlisted workers (Seabees) in the construction of airfields, bridges, ports or buildings – all in support of both humanitarian outreach and military deployment.

Education and Qualifications

Candidates seeking a position in the Civil Engineering Corps must have a four-year degree or within 24 months from obtaining a degree from an accredited college or university, preferably in the field of civil, mechanical or electrical engineering.

Candidates must also be U.S. citizens and willing to serve worldwide.
