Work Location: Las Vegas, Nevada
Salary:
College Level(s): Graduate Student

OVERVIEW

HMS is enterprising healthcare. We provide the broadest range of healthcare cost containment solutions in the industry – all to help payers and at-risk providers like you improve performance.

Back in 1974, HMS identified the multi-billion-dollar problem with Medicaid coordination of benefits, creating a solution from scratch for providers. We adapted that solution to state agencies and then to Medicaid managed care organizations. Later we pushed beyond coordination of benefits into payment integrity – including Medicare – and data solutions for health plans, state and federal agencies, employers and accountable care organizations.

Today we are the most comprehensive cost containment company for healthcare payers in America. We’ve even expanded into population health technology solutions. Using innovative technology as well as powerful data services and analytics, our solutions cover the entire payment continuum:

Eligibility verification
Payment accuracy
Fraud identification and prevention
Cost savings
Performance improvement
Provider education

Based in Irving, Texas, HMS has more than 2,300 employees in 25-plus offices across the country. We are a wholly owned subsidiary of HMS Holdings Corp., traded on NASDAQ (ticker: HMSY), and certified by HITRUST. HMS is URAC-accredited for Health Utilization Management: Vendor Certification. Permedion, a wholly owned subsidiary of HMS, is a QIO-like entity, and is URAC-accredited for Independent Review Organization: External Review and Health Utilization Management. With the support of our leadership, we also promote social responsibility.

Most important, we save our customers billions of dollars a year in overpayment recoveries and billions more through the prevention of improper payments – targeting fraud, waste, and abuse; inappropriate claims; and ineligible claimants. We have one out of every three Americans under contract and strive to make the healthcare system better for everyone.
Enterprising is HMS. And HMS is enterprising healthcare.
