PRODUCTION SOFTWARE ENGINEER

Posting ID: EM1741245B
Company Website: http://www.arroweyesolutions.com

Company: Arroweye Solutions
Work Location: Henderson, NV

Position Type: Full-Time
Salary: DOE

College Major(s): Electrical/Computer Engineering (EE/CpE), Computer Science (CS)
College Level(s): Undergraduate-Senior, Graduate Student

OVERVIEW

Arroweye Solutions, a fast-growing, e-commerce company with unique card manufacturing and personalization capabilities, is seeking a talented professional to work in our dynamic and rewarding environment. Arroweye offers personalized and customized payment cards, which are printed on demand and shipped the next day to leading card issuers and program managers. Arroweye's business solutions include a full range of carrier options targeting payment cards, credit and debit cards, as well as co-branded programs with direct-to-consumer and business-to-business fulfillment. Today, Arroweye Solutions is the only Visa certified (manufacturing and personalization) company operating in the US that prints the Visa logo on demand.

Roles and Responsibilities

Arroweye is looking for a full-time Production Software Engineer to work in our manufacturing facility in Henderson, NV. This position is focused on ensuring the smooth operation and continued innovation of our software-driven manufacturing process. It involves a combination of technical troubleshooting, software development, software maintenance, and database scripting.

The successful candidate will require excellent problem-solving skills, .Net development skills, database programming experience, and a technical passion for continuous self-driven learning. They will update existing software programs that interface to our production equipment, assist in new hardware integration, investigate data-related production issues, and perform software verification. As the company is in a period of rapid expansion, the development of new tools and interfaces is a frequent occurrence.

Education and Qualifications

Qualifications include:
• Development experience with C#, WPF, MVVM, WCF, Winforms
• 3+ years experience with .NET.
• Experience with multi-threading

Marian Mason | Internship & Career Services Coordinator | coecareer@unlv.edu | https://unlv.edu/engineering/jobs
UNLV, Howard R. Hughes College of Engineering
• Familiarity with database programming and Microsoft SQL Server.
• Strong troubleshooting skills in both hardware and software.
• Ability to produce code that is efficient, clean, well-documented and easy to maintain.
• Agile software development experience
• A deep-seated sense of personal responsibility and attention to detail, required in an environment where simple mistakes can have serious implications.
• Understanding of software testing.
• Strong written and oral communication.
• Candidate must pass criminal, financial background checks and drug testing.

Above all, the candidate must have a do-what-it-takes attitude and a desire to be part of a growing and ever-changing company. This position will require overtime and off-hours work as needed. This is a full-time position and comes with health and dental insurance, vacation, employee stock options, and other benefits. A “contractor-to-hire” arrangement may also be considered.
