**Salary:** DOE: based on work and academic experience

**Job Start/End:** January 2016 (recurring every semester)

**College Level:** Juniors, Seniors, and Graduate Students

### OVERVIEW:

We Bring Innovative Products From Mind To Market!

We are seeking mechanical engineering interns to help us develop consumer electronic devices in three areas: Mobility devices, Wearable technology, and Vaporizers.

**Candidates should have an understanding of the following:**

- Electrical circuits
- Battery technology
- Thermal conductivity
- Solidworks or PTC Creo (required)

### Role and Responsibilities:

- Ability to produce two dimensional cross sections based on verbal information
- Ability to convert two dimensional cross sections into three dimensional renderings
- Ability to understand the physical implications of the parts layout including thermal transfer issues, wiring concerns, assembly
- Ability to assist in fabrication would be preferred
- Ability to speak Mandarin would be valuable to the position

You will be given an opportunity to demonstrate your skills in a working interview process. Check out the Thinkazoid website then show us what GEFID means to you!
