

The Las Vegas Sun spent several months exploring **community challenges created by lack of treatment for children with mental health problems.** We have spoken with parents and siblings, educators, doctors, judges, social workers and state leaders for our series of stories, “Children in Crisis.”  
**But we don’t want the conversation to end there.**

Join us for a community forum with several co-sponsors and parents to continue the dialogue. As the state begins revamping its delivery system for children’s mental health services, now is the time for parents and caregivers, health providers and others affected to weigh in.

---

## AS A COMMUNITY, HOW CAN WE DO BETTER?

---
