The Senior Design Project

The senior design project is a part of every UNLV engineering and computer science student’s academic experience. A capstone to his/her educational career, the senior design project encourages the student to use everything learned in his/her program to create a practical, real-world solution to an engineering or computer science challenge. Each student chooses, plans, designs, and prototypes a product in this program designed to stimulate innovation and entrepreneurship. The Senior Design Competition, held each semester, helps to focus the students to increase the quality and potential for commercial application for their projects. The annual Senior Design Award Dinner celebrates the students’ achievements and provides their families, faculty and the greater Las Vegas community an opportunity to share in the excitement of their work.

We invite progressive individuals and corporations to recognize the tremendous talent and potential of our senior design students by participating in this very special evening.

How You Can Help

Our sponsors make both the senior design projects and their celebration possible. As a sponsor, you are helping to change the lives of young people who may soon be prospective employees, researchers, entrepreneurs, and teachers of the next generation.
UNLV’s Howard R. Hughes College of Engineering Invites you to attend the 15th Anniversary Senior Design Award Dinner

Friday, May 6, 2016
$150 per person

Keynote Speaker
John B. Rogers
Co-Founder and CEO, Local Motors

Featuring Entertainment by
CIRQUE DU SOLEIL.

5:30 p.m. Cocktails and viewing of senior design projects in the Cox Pavilion Concourse/ Private Dean's Reception
6:45 p.m. Dinner and the Senior Design Awards Presentation by sponsors
The Cox Pavilion at the Thomas & Mack Center
Business attire

Tables and sponsorships available; please call Jack Aylor (702) 895-2913 or email jack.aylor@unlv.edu for additional information.
