MANDATORY PPE AND MOISTURE CONTROL TRAINING MODULE - WEBCAMPUS

Training for donning and doffing Level III PPE and for Moisture Control are now located in the SDM Training and Important Information Course in WebCampus. The advanced education programs began seeing patients on Monday. In preparation for opening the predoctoral clinics, all faculty, students (especially the DS3 and DS2 students), and all clinical staff will be required to complete this training. Once complete, please take the one-item quiz that attests to your completion. All affected faculty, students, and staff will then be required to complete the hands-on demonstration. Because the plan is to open June 1, 2020, we only have 5 weeks to complete all this training. We ask that you complete the training on WebCampus no later than Friday, May 29, 2020. Mr. Ed Rangel will notify you when the hands-on training will take place. These will be conducted in small groups.

COVID-19 SCREENING

As you are aware, any and all individuals entering UNLV Dental Medicine buildings must complete the COVID-19 screening daily. To address some employees' concerns and to help streamline this process, we have changed the screening form. Employees and students/residents will place a checkmark in the column labeled "temperature" when the temperature is within normal limits; you do not need to record the actual temperature reading. Anyone with a temperature that exceeds 100.4°F will not be allowed to enter. **Anyone can request a private screening form to complete the information and submit.** The faculty, staff, or student/resident must complete the form in its entirety, fold the paper in half and return to the screener. This information will be maintained confidentially and used for the sole purpose of COVID-19 screening.

ADEA PASS (2021 CYCLE OPENS SOON)

The ADEA Postdoctoral Application Support Service (ADEA PASS) is available to all applying to advanced dental education programs. ADEA PASS simplifies the application process by allowing you to complete one standardized application, rather than individual applications to each program. Be certain to verify application requirements for your specific program since not all participate in PASS. The following is for those in the SDM Class of 2021 who are looking to apply for Advanced Dental Education Programs.

Website: <https://www.adea.org/PASSapp/applicants/>

To request a **UNLV SDM Dean's Letter**, please provide the following;

1. Personal Statement
2. Current CV
3. Team Leader and Team Mentor Names
4. Earliest Application Deadline for Your Program

Submit the information to Dr. Kypuros. He will ensure that Dr. Davenport and/or Dr. Ancajas signs and submits the letter.
